

## **ABSTRACT OF THE DISCLOSURE**

2 A halogen work light with a spare bulb container integrally attached thereto is  
3 disclosed. The spare bulb container includes a tubular body and a support piece that fits  
4 inside the closed end of the tubular body and an end piece that friction fits into the open end  
5 of the tubular body. The support piece and end piece both include a longitudinal hole for  
6 receiving the ends of a spare halogen bulb and holding the bulb in a suspended position  
7 inside the tubular body. Both the support pieces are formed of a soft, resilient material, such  
8 as rubber.
